Immediate International Press Release:

Re: Lift the state of emergency in Ethiopia.

Power should be handed over to the people right away.
Release all remaining political prisoners unconditionally.

We are asking the Tigrayan People's Liberation Front Government in Ethiopia, to remove the State of Emergency Immediately. And free all the remaining political prisoners.

Despite our organization's efforts in the release of high profile political leaders and activists, there are still many activists including high profile political prisoners that are imprisoned. The solution for Ethiopia's problem is not a constant state of emergency, power should be handed over to the people right away.

We ask that the American government , African Union, United Nations, European Union, to use their power to lift the state of emergency in Ethiopia.
