

***The genocidal war on Amharas, has the tacit approval of the UN & Western powers.***

By Debru Negash (7 May 2023)

Every so often, nations like humans encounter existential challenges. The predicament which recently befell Ethiopia, the oldest continuously sovereign nation on the planet, is a case in point. Both history and more contemporary examples have shown that it is advanced civilizations that end up collapsing at the hands of barbarians. The Gallas/Oromos, are the barbaric hordes who remain a thorn in the flesh of Ethiopia since they began trickling into its borders in the 16<sup>th</sup> century, after having been expelled by Bantu and Somalis from their respective territories.

It is Gallas' outrageous savagery, their seeming 'Godlessness', repulsive practices that prompted Somalis to call them by the term ***Galla, which means, someone bereft of religion.*** Indeed, their sadistic brutality sets these breed of humans apart from the civilized indigenous Ethiopians and Africans at large. For instance, they eat the flesh of deceased animals and habitually abandon their daughters to the vagaries of nature, as a matter of course. Until recently, a Galla man could only marry, if he could brandish the manhood (penis) of another. Worship of violence and death, which in modern culture is often equated to devil worship, is still a feature of Galla/oromo culture. Their folk tales are imbued with unbelievably sadistic cruelty. They are a unique breed of men to whom indulging in wanton destruction of life and property is a second nature. Tales of the terror the Gallas wrought upon Ethiopians during their violent spread towards every corner of the ancient land, still horrifies many.

***The Gallas/Oromos plunder, slay indiscriminately, disembowel pregnant women, and emasculate (castrate) boys, skin children alive, not to mention their ritual cannibalism. They believe that savouring the blood and flesh of Amaras helps them acquire the chivalry, civility and nobility of their victims, whom they envy and revere in equal measure.*** Since Abiy seized power, Gallas have inundated the Ethiopian media platforms with gory pictures, demonstrating the extent of savagery that they are capable of inflicting on others. Yes, the Gallas/ Oromos are a unique breed of men to whom indulging in wanton killing and destruction is a mark of distinction. No wonder that many distinguished historians and anthropologists consider the Gallas as the most sadistic barbarians in existence and a horrid blight to Ethiopia's marvelled civilization.

***In the Galla 'worldview', opportunism is the name of the game***

For such an archaic ethnic group as the Galla/Oromo, the cult of cruelty and violence has historically been a coping mechanism ensuring their survival and preservation of their primitive traditions despite being surrounded by more populous and far more advanced Ethiopians. The Gallas, often exercised a certain system of restraints that had kept their innate cruelty in check. They characteristically lie low when the central government is in control. Their latent barbarism however, rears its head whenever adversity strikes Ethiopia. Turning on Ethiopians in times of crisis has always been their modus operandi for centuries. In their worldview, opportunism is the name of the game. They are quick to forge alliances with the most powerful to purge their imagined enemies, Amaras. In 1970s and 80s, they allied with the defunct military junta, the Derg, to unleash what was known as a red terror in which close to a million Ethiopians, and mostly Amaras were decimated. When the TPLF took power, the Gallas jumped on its band wagon to plunder and massacre unsuspecting Amaras at will with the connivance of TPLF. As the heir of TPLF, Abiy's Galla/Oromo government, has never

been held accountable for its role in the horrendous atrocities it had committed against Amaras. So, the onus of bringing the murderous Gallas to justice, solely rests on the Amaras.

No wonder, why the Gallas/OLF who cannot stand on their own, suddenly felt emboldened when they ganged up with their former ally, the TPLF, to declare a full-scale genocidal war on Amaras. It is after all, the **TPLF & OLF** duo who *authored Ethiopia's existing constitution which maligns Amaras and criminalizes their identity*. The war to exterminate Amaras, ostensibly has the tacit approval of Western powers. Indeed, the UN, Africa Union, the USA and its European allies are complicit in the ongoing genocidal war on Amaras. *It is evident that the protestant world conferred a Nobel Peace prize on Abiy, a murderous villain, knowingly, as an incentive to help him destroy the Ethiopian Orthodox church and Amaras, its main patrons, on their behalf.*

### ***Galla/ Oromo pagan cult of violence, has become Ethiopia's new state ideology***

It is not at all fortuitous that the Galla/ who are in power in Ethiopia today are engaged in flagrant genocide targeting Amaras and other indigenous Ethiopians. Such outrageous savagery is a perfect fit if you will, for Galla/Oromo collective consciousness. Abiy's plan to embark on a policy of implanting an antiquated, violent and primitive Geda cult, into a consciousness of civilized Ethiopian society as a whole, will be shattered dismally. It has backfired already. That said, there is no reason to believe that this exclusive Galla savagery, disguised as cultural revival, is only destructive for the Amaras and other ancient Ethiopians. The contemptible barbarians too, will pay the ultimate price eventually.

The recent air raid on innocent Amara peasants in Gondar, Wollo, Shoa and Gojam by Abiy's Galla regime, has evoked the wrath of the entire nation. Abiy Ahmed's hero, is the other psychopath and Nazi, Adolph Hitler. The latter too, had made extensive references to archaic cultural symbols (such as the adoption of the Roman salute gesture, references to German myths) as a way of mobilising society. One should remember how this ended for Europe and for Germany itself. The fate of Gallas is unlikely to be any different.

Indeed, the brazen war of aggression on Amaras has brought about a rare mass patriotism, and awareness of the sacrifices needed to stand up to the Galla threat to them, to fellow Ethiopians and their sacred motherland. Whatever happens, nothing will stop the unjustly maligned Amaras and other Ethiopians from victoriously reclaiming their motherland. It will not be long before legions of *Fannos march towards Menelik's palace to salvage it*, as it has been desecrated and defaced by the repugnant savages who had occupied it for too long.

### **Long live Ethiopia.**

*The author is a physician-pilot, whose 52 relatives were butchered in cold blood by Galla/Oromo hordes in 1991 in Eastern Ethiopia (Harar).*
